

Package leaflet: Information to the user

Medicinsk luft Nippon Gases Scandinavia 100 % medicinal gas, compressed

Medicinal air

Read all of this leaflet carefully before you start using this medicine because it contains important information for you.

Always use this medicine exactly as described in this leaflet or as your doctor, pharmacist or nurse have told you.

- Keep this leaflet. You may need to read it again.
- If you have any further questions, ask your doctor, pharmacist or nurse.
- This medicine has been prescribed for you only. Do not pass it on to others. It may harm them, even if their signs of illness are the same as yours.
- If you get any side effects, talk to your doctor, pharmacist or nurse. This includes any possible side effects not listed in this leaflet. See section 4.

What is in this leaflet

1. What Medicinsk luft Nippon Gases Scandinavia is and what it is used for
2. What you need to know before you use Medicinsk luft Nippon Gases Scandinavia
3. How to use Medicinsk luft Nippon Gases Scandinavia
4. Possible side effects
5. How to store Medicinsk luft Nippon Gases Scandinavia
6. Contents of the pack and other information

1. What Medicinsk luft Nippon Gases Scandinavia is and what it is used for

Medicinsk luft Nippon Gases Scandinavia contains air, which is used for inhalation.

Medicinsk luft Nippon Gases Scandinavia replaces normal air whenever a particle free air is required, e.g.:

- As part of the fresh gas flow in respirator treatment and/or in connection with anaesthesia
- As a propellant for inhaling other medicines (nebuliser treatment)
- As pure air in the care of patients susceptible to infections such as in cases of organ/cell transplantation or extensive burn wounds.

2. What you need to know before you use Medicinsk luft Nippon Gases Scandinavia

Pregnancy and breast-feeding

Medicinsk luft Nippon Gases Scandinavia may be used during pregnancy.

Medicinsk luft Nippon Gases Scandinavia may be used during breast feeding.

3. How to use Medicinsk luft Nippon Gases Scandinavia

Always use this medicine exactly as your doctor has told you. Check with your doctor or nurse if you are not sure.

Medicinsk luft Nippon Gases Scandinavia is used by inhalation. You usually breathe medicinal air through a nasal prong or face mask. Either you breathe by yourself (spontaneously) or you are helped to breathe by means of a respirator/ventilator. Medicinal air can also be used in connection with inhalation of medicines (nebulisation).

Medicinsk luft Nippon Gases Scandinavia can be mixed with medicinal oxygen when a higher concentration of oxygen is required.

If you have any further questions on the use of this medicine, ask your doctor or nurse.

Safety instructions

- Medicinsk luft Nippon Gases Scandinavia is intended for medical use only.
- If the label with the batch number is missing or the seal is broken, the cylinder should not be used, but be returned to the supplier.
- Only connect the cylinder to an equipment intended for medicinal air.
- There must be no smoking or open flames in rooms where medicinal air is used.
- Keep the cylinder clean, dry and free from oil and grease.
- Switch off the apparatus when it is not in use.
- In the event of fire – switch off the apparatus.
- The pressure regulator must be opened slowly and carefully

4. Possible side effects

There are no known side effects associated with the use of Medicinsk luft Nippon Gases Scandinavia.

Reporting of side effects

If you get any side effects, talk to your doctor, pharmacist or nurse. This includes any possible side effects not listed in this leaflet. You can also report side effects directly via the national reporting system listed in Appendix V*. By reporting side effects you can help provide more information on the safety of this medicine.

5. How to store Medicinsk luft Nippon Gases Scandinavia

Keep this medicine out of the sight and reach of children.

Do not use this medicine after the expiry date which is stated on the cylinder label.

Store the cylinder in a place reserved for medicinal gases (does not apply to the home environment). Handle carefully. Ensure that gas cylinders are not dropped or exposed to knocks. Must be stored and transported with valves closed and, where these are present, with the protective valve cover/cap in place.

6. Contents of the pack and other information
