Summary Public Assessment Report

Olopatadine Misom
olopatadine hydrochloride

Eye drops, solution, 1 mg/ml

This is a summary of the public assessment report (PAR) for Olopatadine Misom. It explains how the assessment was made and why the authorisation was recommended as well as the conditions of use. It is not intended to provide practical advice on how to use the product.

For practical information about the use of the product, patients should read the package leaflet or contact their doctor or pharmacist.

What is Olopatadine Misom and what is it used for?
The product is a 'hybrid medicine'. This means that it is similar to a reference medicine containing the same active substance.

The reference medicine for the product is Opatanol.

The company has provided additional own data to demonstrate therapeutic equivalence between the product and the reference medicine.

The product is used in the treatment of of signs and symptoms of seasonal allergic conjunctivitis.

How does Olopatadine Misom work?
Some materials (allergens) like pollens, house dust or animal fur may cause allergic reactions resulting in itching, redness as well as swelling of the surface of your eye. This product works by reducing the intensity of the allergic reaction by preventing histamine induced inflammatory cytokine production.

How is Olopatadine Misom used?
The pharmaceutical form is a solution for ocular use.

Please read section 3 of the package leaflet for detailed information on dosing recommendations, the route of administration, and the duration of treatment.

The medicine can only be obtained with a prescription in Sweden.

What benefits of Olopatadine Misom have been shown in studies?
Because the product is a hybrid application and is considered to be therapeutically equivalent to the reference product Opatanol, the benefits and risks are taken as being the same as those of the reference medicine.

What are the possible side effects from Olopatadine Misom?
For the full list of side effects, see section 4 of the package leaflet.
For the full list of restrictions, see the package leaflet.

Why is Olopatadine Misom approved?
It was concluded that, in accordance with EU requirements, the product has been shown to have comparable quality and is considered to be similar to the reference medicine. Therefore, the Swedish Medical Products Agency decided that, as for Opatanol, the benefits are greater than its risks and recommended that it can be approved for use.

What measures are being taken to ensure the safe and effective use of Olopatadine Misom?
A risk management plan has been developed to ensure that the product is used as safely as possible. Based on this plan, safety information has been included in the summary of product characteristics and the package leaflet, including the appropriate precautions to be followed by healthcare professionals and patients.

Known side effects are continuously monitored. Furthermore, new safety signals reported by patients/healthcare professionals will be monitored/reviewed continuously as well.
