

Part VI: Summary of the Risk Management Plan**Summary of risk management plan for Brivaracetam Glenmark 10/25/50/75/100mg film-coated tablets**

This is a summary of the risk management plan (RMP) for Brivaracetam Glenmark 10/25/50/75/100mg film-coated tablet. The RMP details important risks of Brivaracetam Glenmark 10, 25, 50, 75, 100mg film-coated tablets, how these risks can be minimised, and how more information will be obtained about Brivaracetam Glenmark 10/25/50/75/100mg film-coated tablet's risks and uncertainties (missing information).

Brivaracetam Glenmark 10/25/50/75/100mg film-coated tablet's summary of product characteristics (SmPC) and its package leaflet (PL) give essential information to healthcare professionals and patients on how Brivaracetam Glenmark 10/25/50/75/100mg film-coated tablets should be used.

This summary of the RMP for Brivaracetam Glenmark 10/25/50/75/100mg film-coated tablets should be read in the context of all this information including the assessment report of the evaluation and its plain-language summary, all which is part of the European Public Assessment Report (EPAR).

I. The medicine and what it is used for

Brivaracetam Glenmark 10/25/50/75/100mg film-coated tablets is authorised as adjunctive therapy in the treatment of partial onset seizures with or without secondary generalisation in adults, adolescents and children from 2 years of age with epilepsy.

It contains brivaracetam as the active substance and it is given by oral route.

II. Risks associated with the medicine and activities to minimise or further characterise the risks

Important risks of Brivaracetam Glenmark 10/25/50/75/100mg film-coated tablets, together with measures to minimise such risks and the proposed studies for learning more about Brivaracetam Glenmark 10/25/50/75/100mg film-coated tablets risks, are outlined below.

Measures to minimise the risks identified for medicinal products can be:

- Specific information, such as warnings, precautions, and advice on correct use, in the PL and SmPC addressed to patients and healthcare professionals;
- Important advice on the medicine's packaging;
- The authorised pack size — the amount of medicine in a pack is chosen so to ensure that the medicine is used correctly;
- The medicine's legal status — the way a medicine is supplied to the patient (e.g. with or without prescription) can help to minimise its risks.
- Participation in and sponsorship of European and International Registry of Antiepileptic Drugs in Pregnancy (EURAP).

Together, these measures constitute routine risk minimisation measures.

In addition to these measures, information about adverse reactions is collected continuously and regularly analysed, including Periodic Safety Update Report (PSUR) assessment if PSUR is required by Health

Authority, so that immediate action can be taken as necessary. These measures constitute routine pharmacovigilance activities.

If important information that may affect the safe use of Brivaracetam Glenmark 10/25/50/75/100mg film-coated tablets is not yet available, it is listed under 'missing information' below.

II.A. List of important risks and missing information

Important risks of Brivaracetam Glenmark 10/25/50/75/100mg film-coated tablets are risks that need special risk management activities to further investigate or minimise the risk, so that the medicinal product can be safely taken.

Important risks can be regarded as identified or potential. Identified risks are concerns for which there is sufficient proof of a link with the use of Brivaracetam Glenmark 10/25/50/75/100mg film-coated tablets. Potential risks are concerns for which an association with the use of this medicine is possible based on available data, but this association has not been established yet and needs further evaluation. Missing information refers to information on the safety of the medicinal product that is currently missing and needs to be collected (e.g. on the long-term use of the medicine).

List of Important Risks and Missing Information	
Important identified risk(s)	• Suicidality (class label for anticonvulsant products)
Important potential risk(s)	• None
Missing information	• Data during pregnancy and lactation • Long-term effects on growth, endocrine function or sexual maturation, neurodevelopment and cognitive and psychomotor development in paediatric patients

II.B. Summary of important risk

The safety information in the proposed Product Information is aligned to the reference medicinal product.

II.C. Post-authorisation development plan

II.C.1 Studies which are conditions of the marketing authorisation

There are no studies which are conditions of the marketing authorisation or specific obligation for Brivaracetam Glenmark 10/25/50/75/100mg film-coated tablets.

II.C.2 Other studies in post-authorisation development plan

There are no studies required for Brivaracetam Glenmark 10/25/50/75/100mg film-coated tablets.
