

Summary Public Assessment Report

Varenicline Newbury (varenicline tartrate)

SE/H/2196/01-03/DC

Summary Public Assessment Report

Varenicline Newbury
varenicline, varenicline tartrate

Film-coated tablet, 0,5 mg, 1 mg, 0,5 mg + 1 mg

This is a summary of the public assessment report (PAR) for Varenicline Newbury. It explains how the assessment was made and why the authorisation was recommended as well as the conditions of use. It is not intended to provide practical advice on how to use the product.

For practical information about the use of the product, patients should read the package leaflet or contact their doctor or pharmacist.

What is Varenicline Newbury and what is it used for?

The product is a 'generic medicine'. This means that it is similar to a 'reference medicine' already authorised in the European Union (EU) called CHAMPIX.

The product is used in adults to help them stop smoking. It can help to relieve the craving and withdrawal symptoms associated with stopping smoking and can also reduce the enjoyment of cigarettes if smoking when on treatment.

How does Varenicline Newbury work?

Varenicline Newbury contains the active substance varenicline. Varenicline have a similar but weaker effect than nicotine while simultaneously blocking the full effects of nicotine.

How is Varenicline Newbury used?

The pharmaceutical form is film-coated tablet for oral use.

Please read section 3 of the package leaflet for detailed information on dosing recommendations, the route of administration, and the duration of treatment.

The medicine can only be obtained with a prescription in Sweden.

What benefits of Varenicline Newbury have been shown in studies?

Because the product is a generic medicine, studies in patients have been limited to tests to determine that it is bioequivalent to the reference medicine, CHAMPIX. Two medicines are bioequivalent when they produce the same levels of the active substance in the body.

What are the possible side effects from Varenicline Newbury?

Because the product is a generic medicine, its benefits and possible side effects are taken as being the same as the reference medicine.

For the full list of side effects, see section 4 of the package leaflet.

For the full list of restrictions, see the package leaflet.

Why is Varenicline Newbury approved?

It was concluded that, in accordance with EU requirements, the product has been shown to have comparable quality and is considered to be bioequivalent to the reference medicine. Therefore, the Swedish Medical Products Agency decided that, as for CHAMPIX, the benefits are greater than its risks and recommended that it can be approved for use.

What measures are being taken to ensure the safe and effective use of Varenicline Newbury?

A risk management plan has been developed to ensure that the product is used as safely as possible. Based on this plan, safety information has been included in the summary of product characteristics and the package leaflet, including the appropriate precautions to be followed by healthcare professionals and patients.

Known side effects are continuously monitored. Furthermore, new safety signals reported by patients/healthcare professionals will be monitored/reviewed continuously as well.
